

# AQUARIUS C-H

## HIGH SPEED CONTAINMENT ROTARY PRESS

AQUARIUS C-H is THE NEWEST CONTAINMENT PRESS through the latest KIKUSUI containment technology.

It meets hazard production requirement in pharmaceutical plant with potential compounds under industrial hygiene standard and GMP cross contamination protections.

It realizes easy and flexible disassembling & washing operation in the machine under sufficient working space to minimize exposing potent drug in wetting material as well as operator's inhalation risk. Also it is integrated special isolator on machine top with suitable glove ports location engineered under human factors and ergonomics.

### STRONG POINTS

#### ISOLATOR CONTROL

Automatic leak check, Negative pressure monitor & Air flow control in emergency.

#### RTP

Vertical installation of RTP to be easy handling for powder bag and mechanical goods.

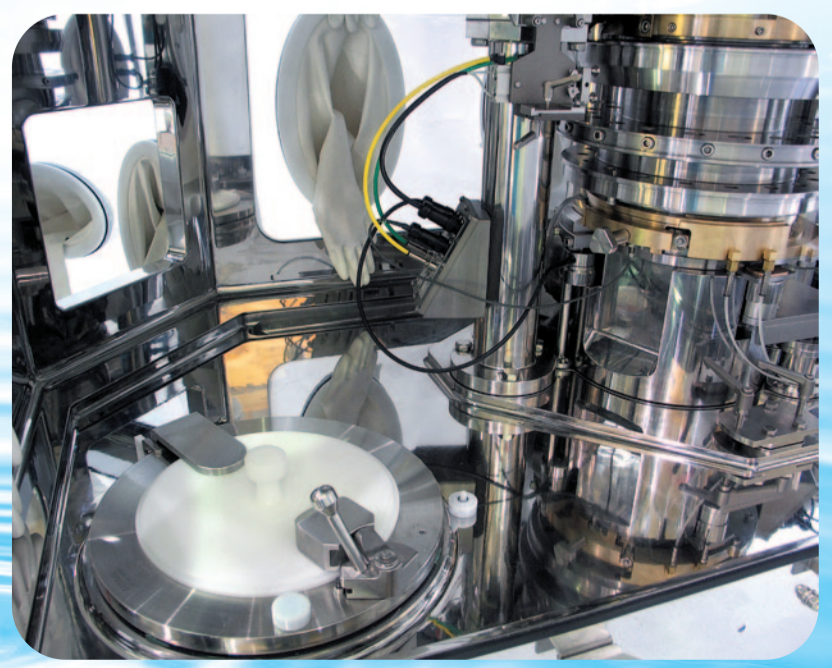

Wider working space inside of the machine to allow washing mechanical parts disassembled.

#### IP65 EXTERIOR

Exterior of machine body designed with IP65.

### BASIC SPECIFICATIONS

Model	AQUC-H
No. of stations	18
Type of tooling	EU19/TSM-B
Max. pressure (kN)	Pre 20 / Main 50
Max. tablet dia (mm)	16
Turret speed (rpm)	10-70
Tablets/hr	10,800 – 75,600
Filling depth (mm)	1-16
Tablet thickness (mm)	0-6
Dimensions (WxDxHmm)	1,400x1,000x2,000
Weight (kg)	3,300

RTP (Rapid Transfer Port)
