## Turret Exchangeable Multi Functional Rotary Tablet Press

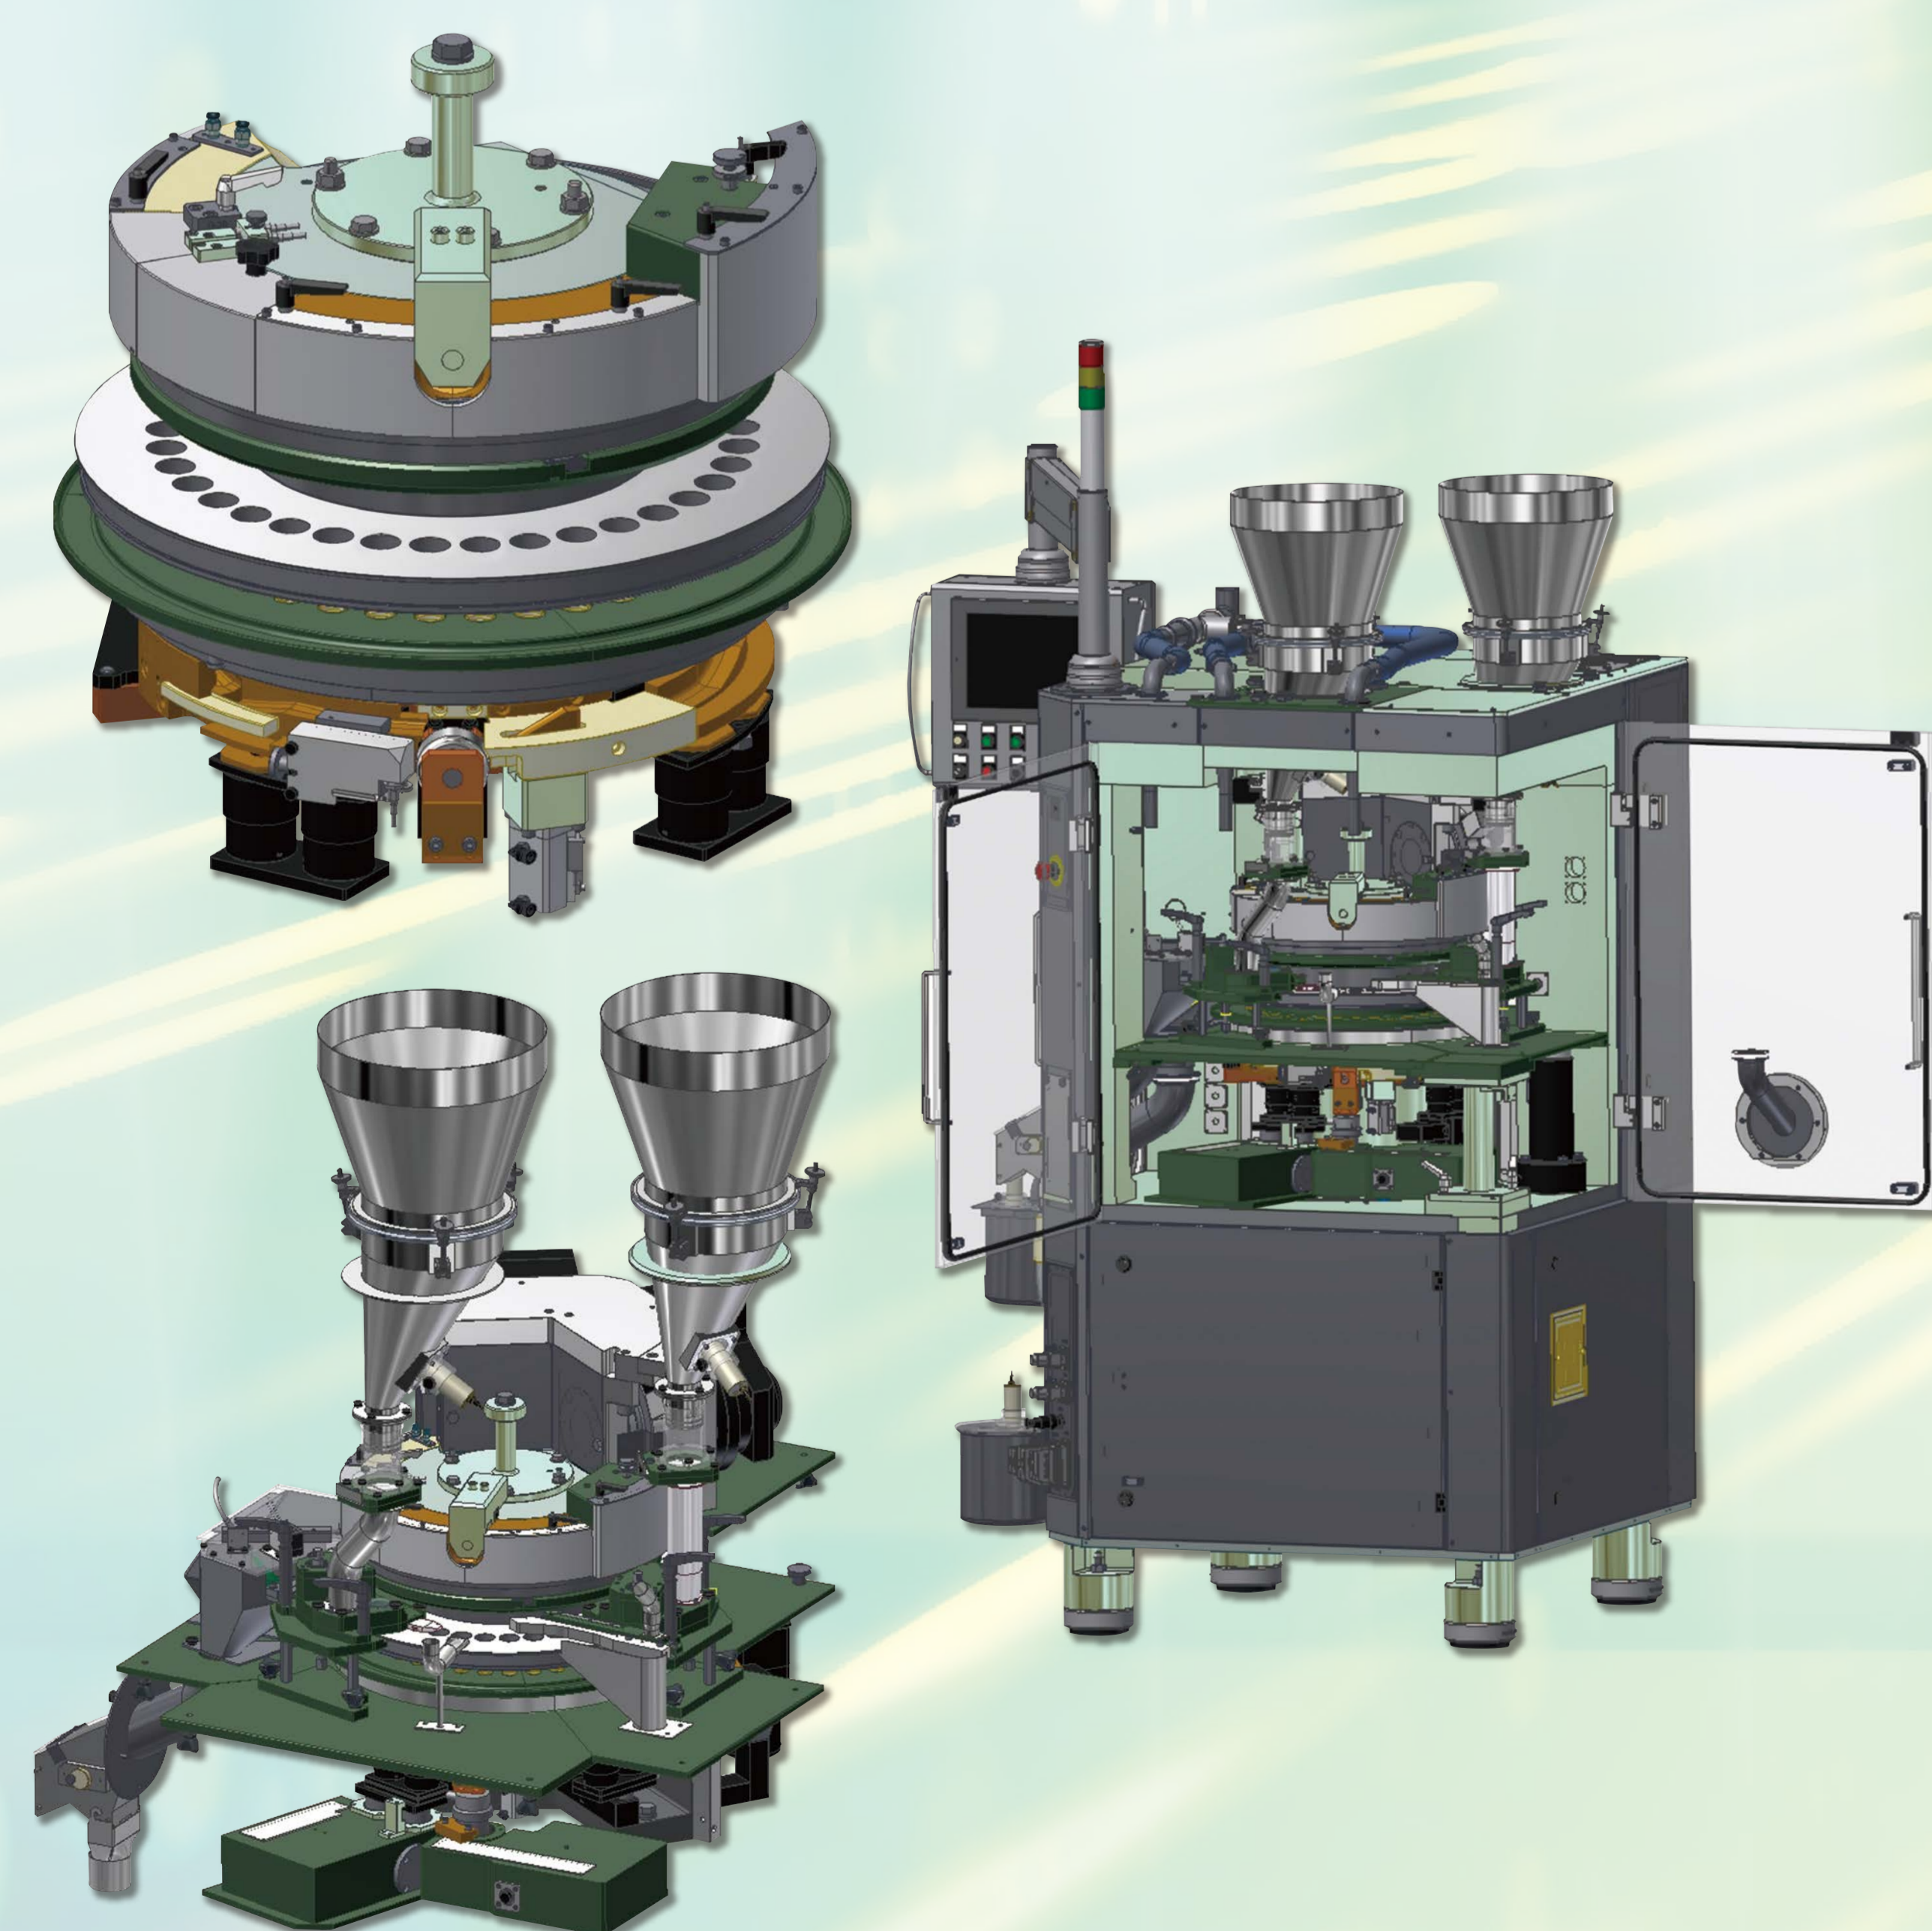

### AQUARIUS G-J-Multi

AQUARIUS G-J-Multi is the newest press designed for pharmaceutical production. Features include simple operation and maintenance, easy access, quick turret exchange. All in a very rugged, reliable and compact design that KIKUSUI has always been known for.

New Key Feature brings **MULTIPLE FUCTION** to 3 major process mode capabilities, **BILAYER**, **DRY COATING** and **REGULAR** mode. It can produce not only regular tablets but also Bilayer tablets as well as Tablet in tablet products on same machine. A simple module & specific turret assembly changes its capabilities quickly. Step by Step guidance on the OIT ensures proper set up.

Regular (Single Layer)

2L (Bilayer tablet)

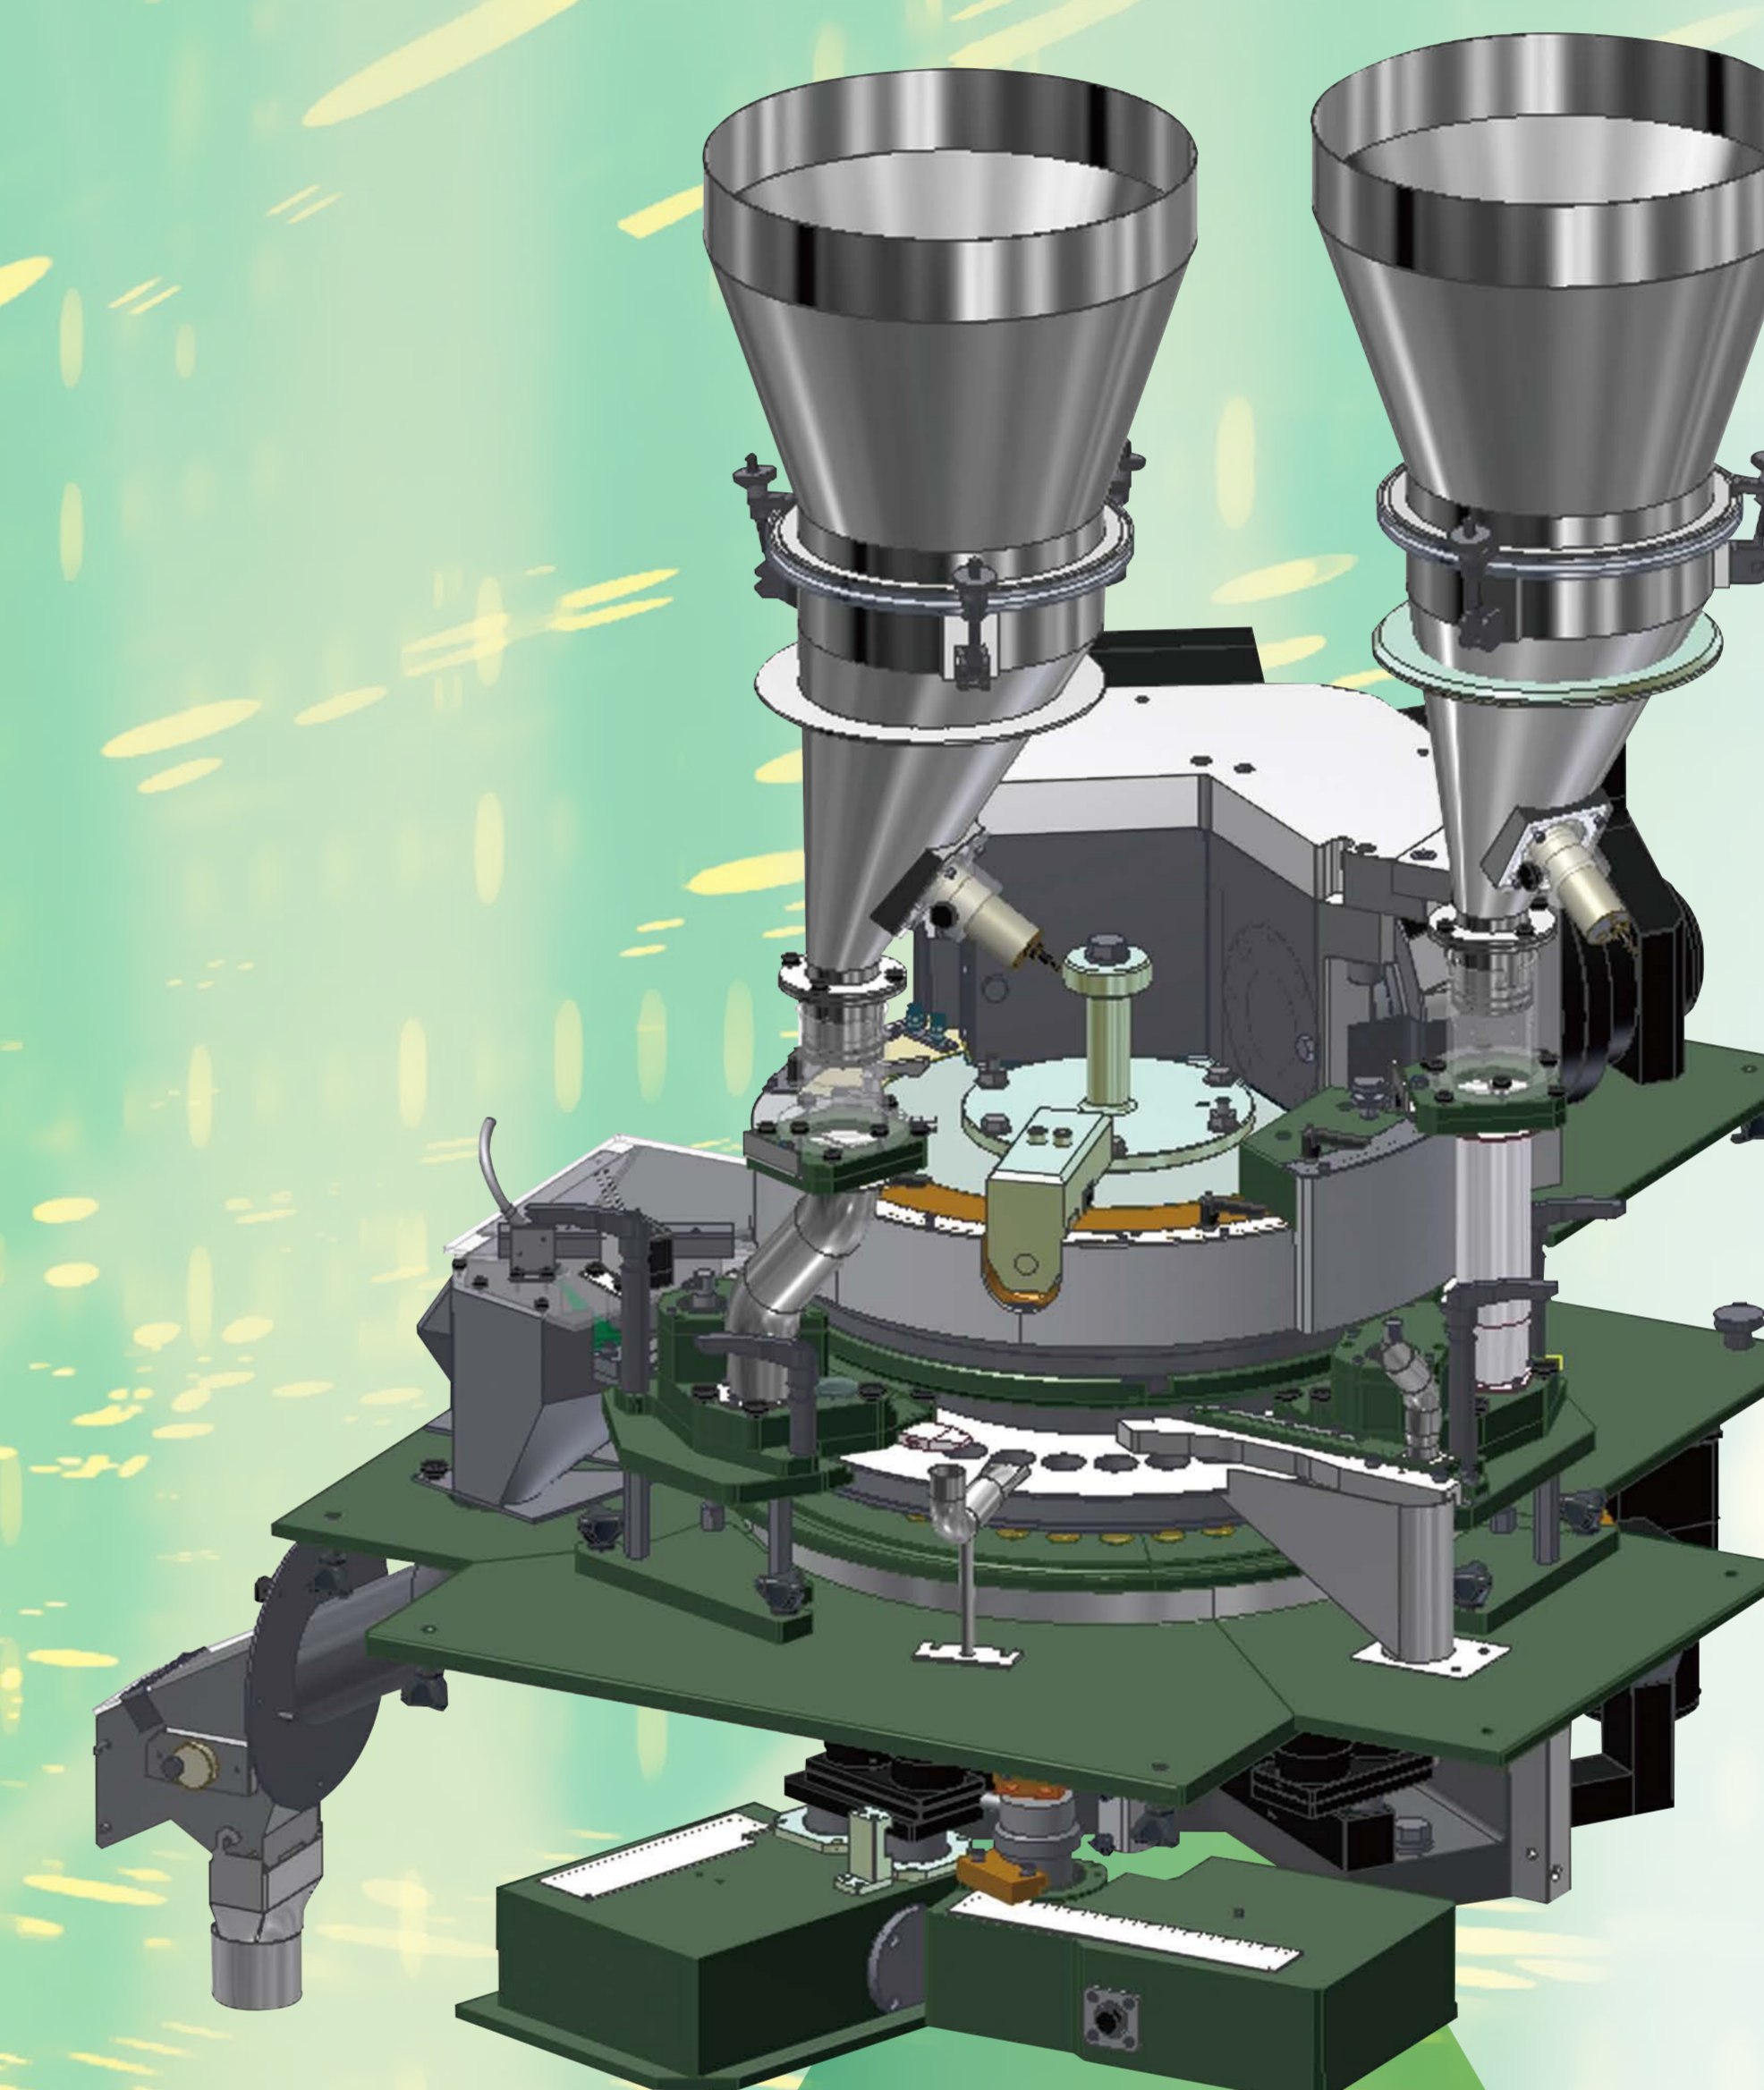

DC (Tablet in tablet)

AQUARIUS G-J-Multi has **MULTIPLE FUCTION** to 3 major process mode capabilities designed by module concept. So the machine can be switched from one mode to another by changing the turret assembly & modules.

- **REGULAR MODE** with Regular turret assembly.
- **2L MODE** consists of 2L turret assembly & 2L modules. (1st filling & Tamping units)
- **DC MODE** consists of DC turret assembly, DC module & DC cabinet.
